

All Your Lifting Solutions

Capability Statement

www.dempseycc.com.au

Dempsey Cranes + Construction (DCC) is a Far North Queensland based business that has been in operation since 2001, our fleet of cranes, excavators, pile drivers, and other machinery has significantly grown. As a supplier for wet and dry hire of heavy lifting equipment, associated transport services and earthmoving machinery, DCC has built a reputation based on accuracy, energy, safety and excellent client service.

Dempsey Cranes & Construction scope of works includes bridge construction, road construction and associated civil projects for public and private clients.

At DCC, we understand every project is unique; we pride ourselves on providing a personalised service to support our clients and partners. Our record of providing an exceptional standard of service with our professional management team has helped us to build long lasting relationships.

Our team of quality operators have experience working across a wide diverse of industries and projects for government and private clients. Whether you need a crane to unload materials, equipment, lift bridge beams, install precast panels, drive piles or erect heavy structures, we have the expertise, experience and equipment to meet your needs safely and effectively.

CRANE & PLANT FLEET

Specialists in the planning and development of critical lifts regardless of location. Cranes from 2.9t to 250t available. excavators, piling, EWPs, skid steers and more to suite your needs.

CIVIL CONSTRUCTION

A reputation of accuracy, energy, safety and excellent client service to complete bridge & road construction and associated projects.

SAFETY & COMPLIANCE

DCC is registered to Compliance Australia Certification Services; Audited internally and externally.

TRANSPORT SERVICES

Heavy vehicles are fitted with Intelligent Access Program (IAP) units, monitored by a third party to ensure the wellbeing of drivers, public and vehicles.

A large crane is lifting a tall, lattice-structured power line tower section. The crane's arm extends from the top right towards the center of the frame. The tower section is being hoisted by cables. In the background, another power line tower is visible, and a wind turbine can be seen in the lower left corner. The sky is overcast. The entire image is framed by a blue border with white curved lines on the sides.

Locations

Dempsey Cranes + Construction operates throughout North Queensland.

The Ravenshoe Depot, the headquarters, is ideally situated to service the North & Western Gulf areas of Queensland & the Northern Territory, including Torres Strait and New Guinea.

The Atherton Depot located in the Tolga Industrial Estate puts our professional service in easy reach to Malanda, Atherton, Tolga, Mareeba and all outlying areas of the Tablelands.

Mobile

Chris Dempsey Cranes has mobile camps allowing us to provide efficient services to our customers in all locations. The camp remains on location for the duration of the project.

DCC camps are designed to provide our staff with a comfortable safe living environment including: first aid facilities, power, generation, catering facilities, ablution system, and waste management.

Advantages are:

- Maximum plant utilisation
- Minimal camp setup
- Self sufficient
- Systems and procedures to ensure safe work practices
- Minimal environmental disturbance

Network

DCC has established an extensive network of suppliers, subcontractors and partners throughout North Queensland with the ability to supply a varied range of equipment and quality service in townships and remote locations.

Plant & Equipment

Dempsey Cranes + Construction has an extensive range of late model cranes, earth-moving plant, and road transport equipment compliant to all ISO AS/NZS standards. The compliance department monitor the fuel efficiency of the entire fleet to highlight equipment for repair, replacement and to minimise fuel consumption and in turn, the companies carbon footprint.

The Heavy Vehicles are fitted with Intelligent Access Program (IAP) units, monitored by a third party to ensure the wellbeing of drivers and vehicles, and monitor data on driver performance to ensure our fleet is travelling efficiently with minimal impact on the environment and infrastructure.

Maintenance

The planned preventative maintenance program ensures all equipment is fully utilised with minimal breakdowns. The fleet is fully serviced and maintained to the highest standards by an experienced team of mechanics and are independently assessed and certified annually to ensure all equipment meets Australian Standard requirements.

The maintenance team offer

- 10-year Crane Inspection
- Preventative Maintenance
- Heavy Equipment Annual Inspection

People

Dempsey Cranes + Construction's experienced team of operators, drivers, labourers are fully ticketed and licensed. All staff undergo rigorous inductions, training and development courses in-house and external.

DCC is a business which prides itself on recruiting local talent from the surrounding areas, people with experience and fresh ideas that value the land.

most valuable asset EMPLOYEES

Safety

DCC operate with their most valuable asset in mind, as first priority being its employees. Their health, safety, welfare being paramount. The company is structured with safety as a priority, with a 'zero harm' approach. The OH&S team oversee all aspects of safety, environment, and quality.

Environment

DCC recognises the value of the land and seek minimal impact to environment and cultural heritage and traditional owners. Continuous improvement and upgrading of the fleet ensure the carbon footprint is kept to a minimum.

Compliance

DCC employs a Compliance & Systems Officer to ensure all policies and procedures are audited through CASA. Independent auditing occurs annually to maintain the company's continual improvement.

Systems

DCC recognises the demand for quality in management for contracts and projects and are continually improving the way the business operates.

Operating over a vast area the company maintains a Cloud Network as well as a fully equipped head office SharePoint.

Quality

The success of Dempsey Cranes + Construction is attributed to the continuous improvement and innovations method approach.

DCC consistently delivers a cost-effective quality service which ensures its client's projects are completed safely, on time and within budget.

The company policies and procedures are periodically audited through our quality system to ensure relevance and accuracy.

Planning

The Director and management team are committed to lead Dempsey Cranes + Construction into the future, driving our strategic focus on quality, safety and continuous improvement to expand the company.
